BROADCAST BOOTH & STUDIO NOTICE

ON AIR: Live Automated Captions Active

Post this sign in broadcast booths, commentary desks, podcast studios, and green rooms.

This broadcast uses Zip Captions to deliver real-time captions to our viewers. Please keep these microphone habits in mind while on air.

Studio / Producer Caption Monitor Code

4 Microphone Tips for Hosts, Commentators & Guests

1. Stay On-Axis: Keep a consistent distance (about a fist's width) from your broadcast microphone.
2. Avoid Crosstalk: Try to speak one person at a time during fast commentary or panel segments so every voice is transcribed cleanly.
3. Use Your Cough / Mute Switch: Mute your microphone when clearing your throat, shuffling papers, or speaking off-air to the producer.
4. Introduce Names Clearly: State guest names and team or topic terms clearly at the start of each segment.

Broadcast Accessibility

* Live captions are being sent in real time to our stream output (OBS Studio / vMix / Twitch).
