CLINIC CONSULTATION & EXAM ROOM SIGN

Clear Communication: Live Screen Captions Available

Follow your appointment in real time with large, easy-to-read live captions.

Understanding health information clearly is important. Your clinician can turn on Zip Captions on the room computer or tablet so you can read spoken words in real time.

What You Should Know About Privacy & Comfort

1. No Recording or Storage: Zip Captions processes speech transiently and holds text only in local browser memory during your conversation.
2. Erased Before You Leave: When the browser tab is closed or refreshed at the end of your visit, the transcript is permanently gone.
3. Easy-to-Read Display: Ask your clinician to increase the font size or switch to high-contrast mode at any time.
4. Bring a Family Member or Caregiver: You can also view the captions on a second tablet or smartphone in the room.

Clinical Communication Standards

* Automated speech-to-text supports clear everyday conversation and does not replace certified medical interpreters when required.
