BROADCAST ENGINEERING QUICK REFERENCE

CC Zip Captions

OBS Studio, vMix, Twitch & Stream Deck Integration Cheat Sheet

Localhost and LAN setup reference for connecting Zip Captions to your broadcast workflow.

STUDIO LAN / LOCALHOST NETWORK ARCHITECTURE

PORT 4455 | WEBSOCKETS

OBS Studio (Native WebSockets)

In OBS, go to Tools > WebSocket Server Settings. Enable the WebSocket server (default port 4455), copy the password, and paste the IP/Port/Password into Zip Captions Settings.

PORT 8088 | WEB CONTROLLER

vMix (Zip Captions vMix Chrome Extension)

Enable the vMix Web Controller in vMix Settings. Add a Title input named LiveCaptions. In the Chrome Extension options, enter the vMix IP (127.0.0.1 for same PC, or LAN IP) and port (default 8088).

ZIP CONNECT EXTENSION

Twitch Chat Relay (Zip Connect Extension)

Open zipcaptions.app in one Chrome tab and your Twitch channel chat in another tab. Click the Zip Connect icon and press Start to post captions straight into chat.

BITFOCUS COMPANION

Elgato Stream Deck (Bitfocus Companion)

Search for the official Zip Captions module inside Bitfocus Companion to add physical hardware buttons for Start, Stop, Clear, and Broadcast toggle.

VOD & NLE SUBTITLE EXPORT

Post-Production Subtitles (.SRT / .VTT): At the end of your broadcast, click Export in Zip Captions to download time-coded SRT or WebVTT files for Premiere Pro, DaVinci Resolve, or YouTube.

AUDIO ROUTING TIP FOR MULTI-PC RIGS

Run Zip Captions on a lightweight secondary laptop connected to your mixer via a USB Sound Card, and send caption text to your main vMix or OBS machine over your studio LAN.
