CC Zip Captions

Need Live Captions? Just Ask Our Reception Team

We can display real-time captions of our conversation on a screen or tablet right here at the desk.

DESK BROADCAST CODE (OR READ DIRECTLY ON OUR TABLET)

`https://zipcaptions.app/stream/...`

Busy waiting rooms and check-in counters can make hearing difficult. We are happy to provide live speech-to-text captions during check-in, scheduling, or consultations.

HOW OUR LIVE CAPTIONS WORK

- Ask at the Desk: Let our receptionist or clinician know you would like to read live captions.
- Read Comfortably: View large, high-contrast text on our counter tablet, or scan the code above to read on your own smartphone.
- Private by Design: Captions run transiently inside the local web browser memory and are never saved on external servers.
- Cleared After Every Visit: Our staff closes or refreshes the browser window immediately after our conversation.

PATIENT COMMUNICATION NOTICE

Live captions are provided as a practical visual aid for everyday check-in and routine communication.
If you require a certified medical or sign language interpreter for your clinical visit, please let our staff know.
